 - Major GPA: 3.37
-

Core Technical Skills:

Technologies: C, C++, Java, L^AT_EX, Python, Shell Script, SQL, Laravel, Selenium, Docker

Personal Work:

Basic Economics Application Solves Economics problems, developed for a difficult course. GUI will solve based on inputs given, if possible. The GUI is very slow and can take many seconds to find the answer.

Basic Finances Application Tracks finances and helped me to understand OOP in Swift. Uses basic Object Oriented Programming to save a finances Object to device storage, can be repeated many times. Excludes any design to make the application more friendly to the user.

Portable 12V Display Allowed the use of an old laptop display as an external monitor. Built from an Acer Laptop screen and a driver board.

iPhone Repair Fixed customer's phones for the price of hours worked.
