Core Technical Skills:

Technologies: C, C++, Java, LaTeX, Python, Shell Script, SQL, Laravel, Selenium, Docker

---

Personal Work:

Basic Economics Application Solves Economics problems, developed for a difficult course. GUI will solve based on inputs given, if possible. The GUI is very slow and can take many seconds to find the answer.

Basic Finances Application Tracks finances and helped me to understand OOP in Swift. Uses basic Object Oriented Programming to save a finances Object to device storage, can be repeated many times.

Portable 12V Display Allowed the use of an old laptop display as an external monitor. Built from an Acer Laptop screen and a driver board.
